INTERMEDIATE SNOWBOARDS

FREERIDE COMPOSITE BOARDS WITH POLYMER-CORE CONSTRUCTION

Engineered composite resin provides excellent durability matched with flexibility for novice to trick rider.

- Twin-tip shape design gives the FreeRide Series 130 and 145 the widest range of versatile performance.
- Beveled side cuts allow predictable to aggressive edge control.
- Tapered twin tips provide soft and forgiving landings on "Big Air" tricks.
- Maximum core thickness provides strength.
- High-gloss scratch- and scuff-resistant in-mold graphics are based on the latest trends.

FREERIDE 110 – AGES 7-12

#1069 – CHILD'S WEIGHT UP TO 95 LBS.

- Unique rocker-bottom design teaches simple, safe slalom turns.
- Center-tunnel hull design assists balance and straight-line tracking
- Step-in bindings have shoe-size adjustability.

STEP-IN BINDINGS

Riders up to 160lbs

- Soft-side adjustable step-in bindings

TM

BODY SLED

THE SLED YOU WEAR!
An exciting new sledding experience!

BODY SLED

#53035 – the sled you wear

SEAT:

Slick bottom surface for fast, fun sledding. Cushion top for comfort. Adjustable straps secure seat around your waist and through your legs.

HANDS:

Hand controls help guide your ride. Elastic straps hold the hand pads securely in place around the palm of your hands.

FEET:

Foot controls also help guide your ride. Adjustable straps secure foot pads around your ankles and boots.

The BodySled™ from EG is the most exciting new sledding product on the market today. It's fast, safe and fun.

It's safe sledding. You can't fall out of a BodySled. Stopping is a breeze – simply roll to your left or right side and ensure the bottom slide is off the snow. Or, to come to a quick stop, roll all the way over on your stomach.

It's easy to use – simply sit and slide. Hand and foot controls help with guidance. No more carrying or pulling a big bulky sled to the slope or back up the hill. With the BodySled, you're wearing your sled. Simply put the body sled on over your snow suit and off you go!

You can get a running start. You can sit and get pushed. You can even get pulled on it like a regular sled with a rope.

It allows you the freedom to do freestyle tricks, moves, spins and more – things you just can't do with a conventional sled. You can go down in a chain or line of people. You can do anything that you can do on a conventional sled and do it all faster, freer, more comfortably and safer.

Patent Pending
